                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 RESULT 333
US-09-371-772B.

Sequence 732, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Ravco, Pam

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

CURRENT FILING DATE: 1999-08-10

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFFWARR: Patentin Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Re
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 APPLICANT: Pavor, Pam

Sequence 4, Application US/09370541

Sequence 4, Application US/09370541

Patent No. 663902

GENERAL INFORMATION:

APPLICANT: Mancharan, Muthiah

APPLICANT: Prakash, Thazha P

APPLICANT: Princh Aminoxxy-Modified Nucleosidic Compounds And Oligomeric

TITLE OF INVENTION: Compounds Prepared Therefrom

TITLE OF INVENTION: Owners: US/09/370,541

CURRENT APPLICATION: NUMBER: US/09/370,973

EARLIER PILING DATE: 1998-08-07

EARLIER PILING DATE: 1998-01-30

EARLIER APPLICATION NUMBER: 09/016,520

EARLIER APPLICATION NUMBER: 09/016,520

EARLIER APPLICATION NUMBER: 09/37,143

EARLIER PILING DATE: 1999-02-14

EARLIER PILING DATE: 1999-06-25

NUMBER OF SEQ ID NOS: 21

SEQUENTARE PLEATING DATE: 1999-06-25

NUMBER PER PATENTING NUMBER: 09/374,260
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              JOSTON 100 14 Application US/09989706

Fatent No. 6653108

GENERAL INFORMATION:

APPLICANT: PARK, HAN-OH

APPLICANT: JANG, MI-SOK

TITLE OF INVENTION: BROCESS FOR PREPARATION OF FULL-LENGTH CDNA AND ANCHOR

TITLE OF INVENTION: USED FOR THE SAME

PILE REPRENCE: 024018-0119

CURRENT APPLICATION NUMBER: US/09/989,706

CURRENT APPLICATION NUMBER: WR 10-201-021

PRIOR APPLICATION NUMBER: KR 10-201-022956

PRIOR PILING DATE: 2001-04-27

NUMBER OF SEQ ID NOS: 15

SOFTWARE: Patentin Ver. 2.1

LENGTH: 19

Sequence 24, Application US/10116993

Sequence 24, Application US/10116993

Publication No. US20030044947A1

GENERAL INFORMATION:
APPLICANT: The Board of Regents of the University of Nebraska

TITLE OF INVENTION: EXPRESSION IN YEAST

FILE OF INVENTION: EXPRESSION IN YEAST

CURRENT APPLICATION NUMBER: US/10/116,993

CURRENT FILING DATE: 2002-04-05
                                                                                                               APPLICANT: Marges, Catherine
